

Electron Trolley

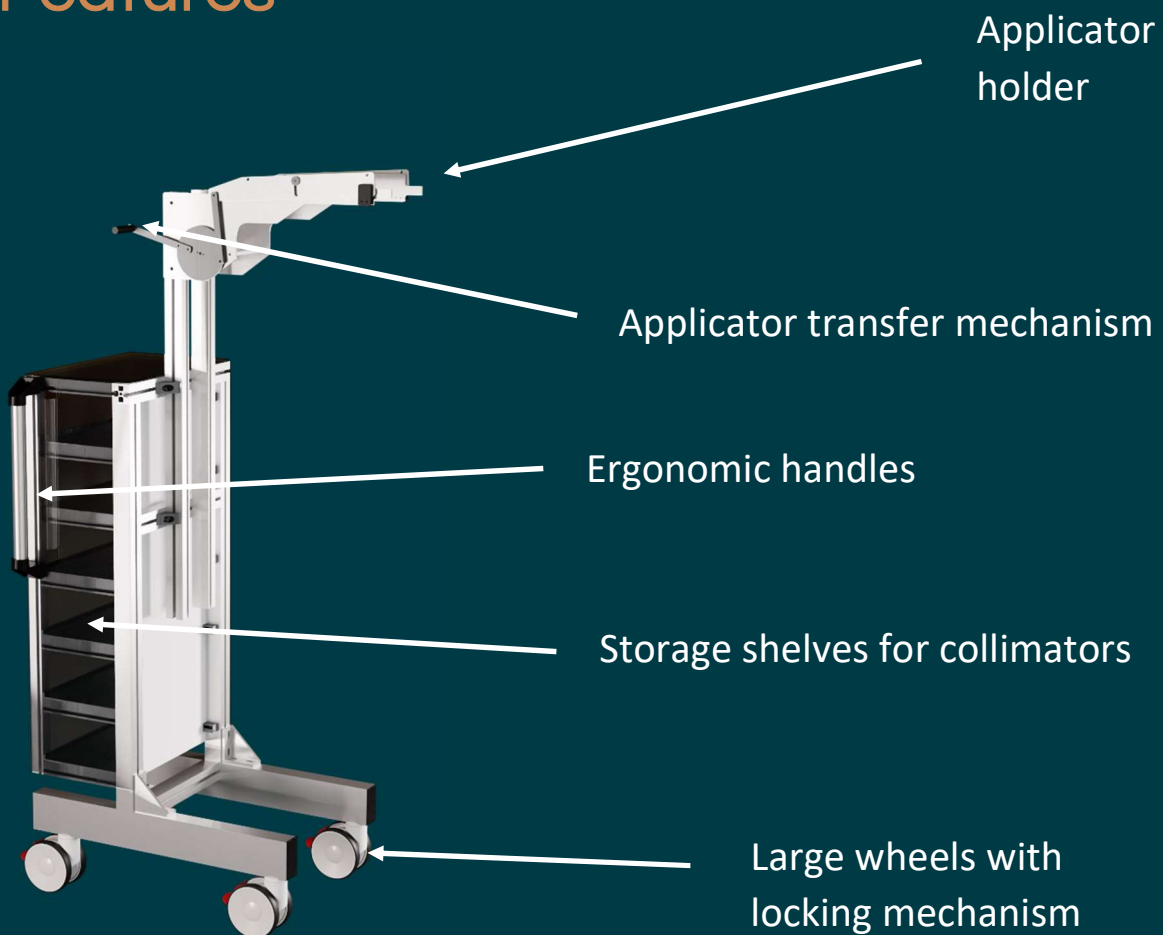

Cumbersome electron applicators become easy to handle with the Omniscopiq electron trolley

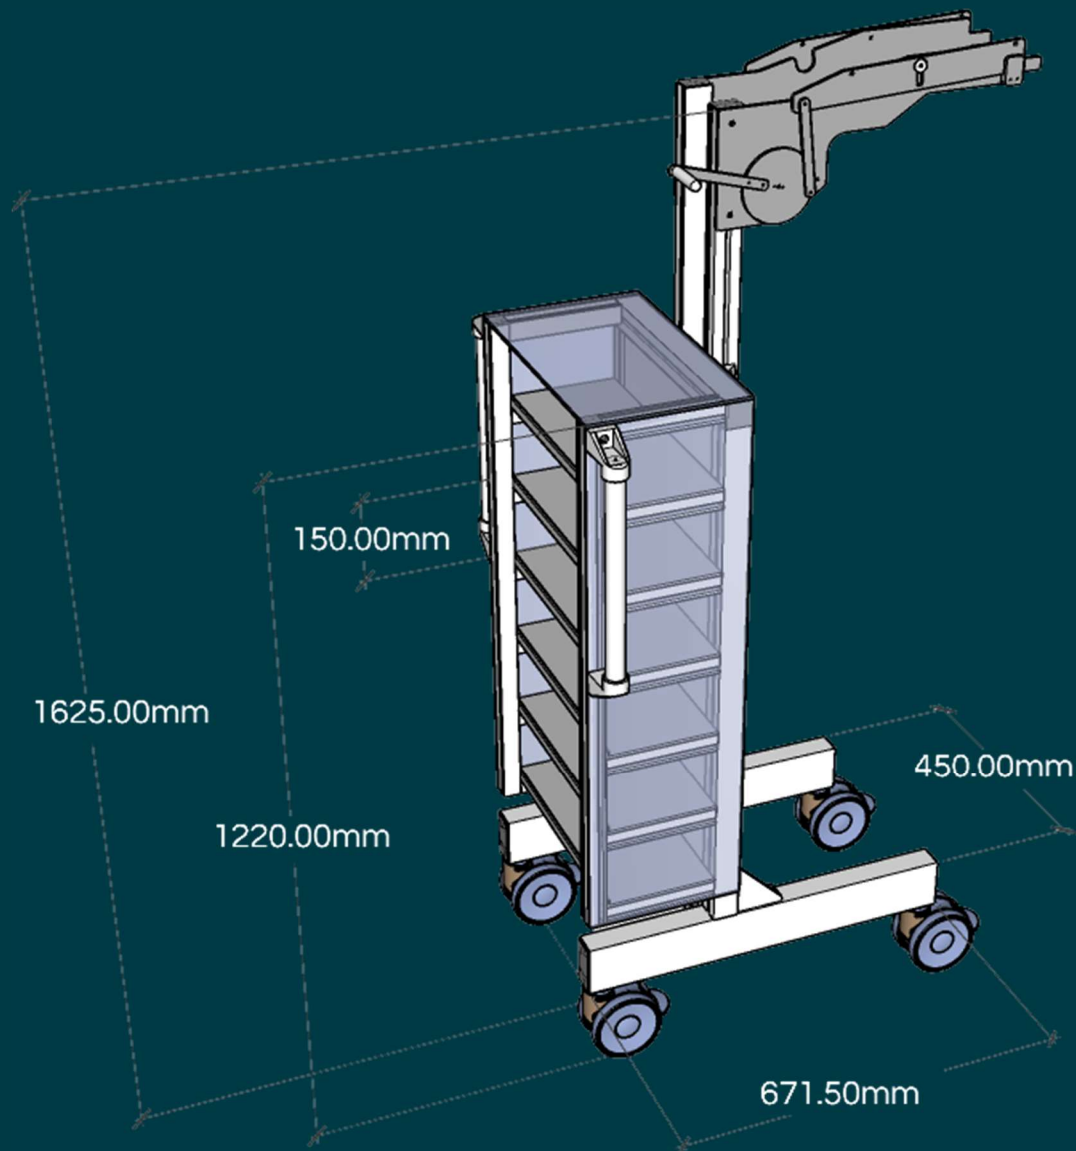

Electron Trolley for secure handling

A 2020 study (1) reported that *'Radiation therapists appear to be at considerable risk for work-related musculoskeletal injuries, which corresponds with findings of studies on health care employees. The high prevalence observed among radiation therapists (76%) is similarly high among nurses'*, whilst others reported that the *'Cost per medically consulted injury in 2022 was \$40,000' (2).*
